LNMIIT, Jaipur

PARTNERSHIP PROPOSAL

The Live Problem Sprint

We solve your real business problem at no cost.

01 Who We Are

Finlogue is the official finance and consulting syndicate of LNMIIT (The LNM Institute of Information Technology), Jaipur. We are a team of highly motivated students specialising in finance, business analytics, strategy, and operations.

We work on live business problems, not textbooks. We run workshops, case studies, and industry sessions throughout the year. Now, we are taking that energy directly to startups and businesses like yours.

Finance is not just learned at Finlogue it is lived. We are not looking for projects to practise on. We are ready to deliver real work.

02 What We Are Offering You

We are offering you something straightforward:

Share a real problem from your business. We assign a dedicated team. We work on it seriously and deliver a structured solution at no cost.

This is called the Live Problem Sprint. It is a structured engagement where a focused Finlogue team of 3 to 5 members works directly with your business over 1 to 3 weeks to solve a specific challenge you are facing.

You do not pay anything upfront. You do not sign a contract. You simply share a problem, we get to work, and we deliver.

03 What is in it for You

Here is exactly what your business gains from this engagement:

Free Expert Analysis

Structured financial, operational, or strategic analysis on a real problem at zero cost. Work that would typically cost Rs. 30,000 to Rs. 1,00,000 from a professional firm.

Fast Turnaround

Our sprint model is built for speed. We scope tightly and deliver within 1 to 3 weeks. You get actionable output fast.

A Real Deliverable

A proper output a financial model, strategy deck, market analysis, process map, or report not just verbal advice. Something you can actually use.

Fresh, Unbiased Perspective

No internal politics, no preconceived notions. We look at your problem with fresh eyes and structured thinking.

Access to Skilled Talent

If you like our work, you can hire team members for part-time, freelance, or internship roles. No middleman, no placement fee.

Complete Confidentiality

Everything you share stays within the sprint team. We treat your business information with the same discretion a professional firm would.

You get the output of a consulting engagement structured, professional, and actionable without the consulting fees. The only ask: if you love the work, consider bringing someone from our team on board.

04 How It Works

The entire process has six steps. We handle most of it.

1

You Share Your Problem

Fill a short form or have a 30-minute call with us. Tell us the challenge you are facing finance, growth, operations, pricing, data, or strategy.

2

We Scope It Together

A Finlogue lead sits with you to understand the problem in depth and agree on what the final deliverable will look like. You know exactly what you will receive before we begin.

3

We Assign a Dedicated Team

We put together a team of 3 to 5 members matched to your problem type: finance specialists, data analysts, strategy thinkers, or operations minds.

4

The Sprint Begins

Our team works on your problem over 1 to 3 weeks with 1 to 2 quick check-ins for data or clarification. You do not need to manage us—we manage ourselves.

5

We Present and Deliver

A structured debrief, clear recommendations, and a final deliverable you can act on immediately.

6

You Decide What Happens Next

No fee. No pressure. If you found value in our work and want to continue with our team in any capacity, we make that easy. The deliverable is yours to keep.

05 What Kind of Problems We Can Solve

Our capabilities span three core areas. If your problem touches any of these, we can help:

Finance and Strategy

Financial modelling Unit economics Fundraising prep
Pricing strategy P&L analysis
Budget forecasting

Analytics and Data

Customer analytics Cohort analysis KPI dashboards
Performance reporting Market sizing

Operations and Consulting

Process mapping Cost reduction
Go-to-market plans Vendor analysis Org structure review

06 The Deal: Simple and Fair

What You Give Us

Your time: One 30-minute call to explain the problem.
Your trust: Share relevant context and data with us.
Your feedback: Tell us if the solution worked for you.
Optionally: Hire a team member if you love the work.

What You Get

A dedicated team solving your problem.
A structured deliverable you can use immediately.
A professional presentation of findings.
Zero cost, zero obligation, zero risk.

07 Why Work With Us

You might wonder: why trust students with a real business problem?

We are trained, not just enrolled. Finlogue members work on case studies, financial models, and real analytical projects throughout the year. We are not learning on your time.

We are accountable. Every sprint has a lead, a defined scope, and a committed delivery date. We treat this like a professional engagement because it is one.

We have no agenda. We are not selling you software, a follow-on service, or a package. We just want to do great work making our advice genuinely unbiased.

We move fast. No bureaucracy, no lengthy onboarding. We get started within days.

Our Portfolio of Work

Pitch on the Rocks POTR 2026

Pitch on the Rocks (POTR) is Finlogue's flagship startup-investor engagement event held annually at LNMIIT, Jaipur. It follows a structured three-stage evaluation and interaction format designed to ensure quality screening, meaningful feedback, and focused investor engagement.

The event witnesses participation from 25+ startups spanning diverse sectors, who pitch their ideas before a panel of 6 investors and startup ecosystem leaders, marked by high-quality founder-investor interactions, structured feedback sessions, and mentorship-driven discussions.

POTR 2025 TOTAL FUNDING ASK OF RS. 30 CR+ | 25+ STARTUPS PITCHED | 6+ ACTIVE INVESTORS AND ECOSYSTEM LEADERS

Event Format

Online Pitch Deck Submission (Before 23 Jan) Startups submit their pitch decks for initial screening. Submissions are reviewed based on idea clarity, market potential, scalability, and execution readiness.

Judgement and Mentorship Round (6th February) Shortlisted startups present before a panel of investors, entrepreneurs, and finance professionals. Founders receive in-depth feedback and guidance to refine their pitch, narrative, and strategy.

Investor Round (7th and 8th February) Selected startups engage in closed-door discussions with investors, covering business deep-dives, strategic conversations, and potential investment exploration.

Investor and Mentor Panel

POTR brings together leading angel investors, venture partners, and finance professionals who engage directly with founders across structured sessions and closed-door discussions. This year Finlogue is in active discussions with Value Bridge Capital, Sixth Sense Ventures, 247VC, India Accelerator, Swishin Ventures, and Warmup Ventures.
